### LETTER OF REFERENCE

On behalf of the Organizing Committee of the 18th International School on Vacuum, Electron and Ion Technologies (VEIT), held October 7 – 11, 2013, in Sozopol, Bulgaria, I would like to express our satisfaction for the professionalism of the services provided by SELENA Hotel and our gratitude to its entire staff for its friendly attitude allowing for excellent cooperation.

I would further like to emphasize the correct and purposeful communications with SELENA Hotel staff both during the School preparation and in Sozopol. All participants, 100 from 15 countries, were impressed by the high level of service and the quality and aesthetics of the dishes in the refined atmosphere of SELENA restaurant. Moreover, the pleasant ambiance in the lobbies, halls and the adjoining terrace contributed to beneficial contacts between the attendants in an informal atmosphere. Not surprisingly, the Dutch co-organizer of the event, Prof. Richard van de Sanden, director of the Dutch Institute for Fundamental Energy Research, Nieuwegein, The Netherlands, noted that, in the 34-year history of VEIT, SELENA Hotel offered the best so far organization and conditions for holding the School.

It is a pleasure for VEIT Organizing Committee to recommend SELENA Hotel as a very reliable partner in holding national and international forums. We appreciate the great contribution of SELENA for the successful implementation of one of the longest-standing scientific conferences held in our country and look forward to continuing our collaboration in the future.

With kind regards and best wishes:

Dr. Miglena Dimitrova,  
Co-Chair of the Organizing Committee
